Stringybark

THE MOUNTAIN RANGE

A striking blend of highland species

Stringybark is a blend of various Stringybark species native to various areas of New South Wales, bringing warmth to interior colour schemes. The texture of Stringybark is moderately fine and even with a straight grain. It is generally a light coloured blend ranging from pale yellow through to soft golden hues and light browns.

Flooded Gum (Rose Gum)

THE MOUNTAIN RANGE

Flooded Gum (Rose Gum) Classic Grade

Luxurious, rich, and beautiful

Flooded Gum is highly prized for its unique, subtle rose tones that vary from the pale pink to soft reds and red browns. Flooded Gum is ideal for luxurious domestic applications that require a rich but gentle aesthetic. It has a straight grain, an even texture and the occasional, natural scribble pattern.

Janka (hardness) rating – 7.5

AFS/01-31-38

PEFC/21-31-38

Promoting sustainably managed forests.

Boral Timber hardwood flooring is AFS Chain of Custody certified. This provides peace of mind that Boral's timber flooring is sourced from sustainably managed and legal forestry. The certification is linked to the only forest management certification scheme with an Australian Standard (4708-2007).

Messmate Classic Grade

Note: Variations of colour within a timber species are normal, therefore photographs, samples and display floors can only be indicative of the colour range of the timber species nominated. Timber is a natural product and commonly reacts to changes in atmospheric conditions such as humidity and temperature. This is considered normal. It is recommended that these species are viewed at a timber flooring showroom before a decision is made on colour.
